Joel Bello

Senior Full Stack Engineer (Node.js, NestJS, Next.js) | AI & API Specialist | Building Scalable Systems
Pontevedra, Galicia, Spain

Summary

Full Stack Engineer with 6+ years of experience building scalable web applications and backend systems used by 1M+ users.I specialize in Node.js, NestJS, and Next.js, with a strong focus on API design, performance, and clean architecture.Recently, I've been focused on AI-powered systems using OpenAI, building tools that automate workflows and improve business efficiency.What I do:• Build scalable SaaS platforms • Design and develop robust APIs • Integrate AI into real-world applications • Optimize performance across backend and frontend I care about writing clean, maintainable code and building products that actually deliver business impact.Open to remote opportunities and high-impact projects.

Experience

LogicalMinds.co

Full-Stack Developer | AI Integration & Local SEO Platform
May 2025 - March 2026 (11 months)
1913, 1007 N Orange St. 4th Floor , Wilmington, DE, New Castle, US, 19801

Developed and architected a comprehensive local business management platform serving small and medium businesses. Led end-to-end development of AI-powered features that automated business description generation and content optimization.

Key Achievements:
• Built scalable Ruby on Rails API architecture with modular service patterns and comprehensive error handling
• Designed and implemented AI-powered business description generator using LLM integration, incorporating local keywords and business data for SEO optimization
• Developed responsive React.js frontend with Next.js, featuring dynamic forms, real-time validation, and intuitive user workflows

• Created multi-step onboarding system with keyword management, business profile completion, and AI-assisted content generation
• Implemented secure authentication, CSRF protection, and robust error handling with centralized logging
• Integrated third-party APIs for location services and business data management
• Established internationalization framework and component-based architecture for scalability
• Delivered features that provided clear value proposition to users through automated content generation and local SEO optimization

Technologies: Ruby on Rails, React.js, Next.js, JavaScript, PostgreSQL, RESTful APIs, Git, Agile methodologies

Contributed to a platform that helped local businesses improve their online presence and search rankings through automated, AI-driven content optimization.
